[11:42 AM] Guest168 (anonymous) has left the room

[11:43 AM] modulok30: **daniel, is there any chance of some tweaks in the client control plugin?**

[11:43 AM] Guest333 (anonymous) has joined the room

[11:44 AM] Guest333 (anonymous) has left the room

[11:44 AM] Nulani (nulani@neko.im/Mundilfari) has joined the room

[11:44 AM] daniel.henninger: **if you submit a patch, sure! =)**

[11:45 AM] Guest414 (anonymous) has left the room

[11:45 AM] ryushie: **is there any reason why When i add a LDAP group to share with my group for auto population it has a hard time seeing the other group, Example: Im in group A, i can see all people in group A, People in Group B are shared with my**

group but i have a hard time populating my list to show people from Group B

[11:45 AM] modulok30: how about reordering ability for URLs? It would be nice to order them in ABC or custom.

[11:46 AM] akrherz: modulok30: you lost me there, what are you asking for?

[11:47 AM] modulok30: lets say I have five URLs listed in the shared bookmarks

[11:48 AM] modulok30: openfire/spark orders them in the order I input them, I cannot reorder them to my personal liking. ABC order would probably be the best.

[11:49 AM] daniel.henninger: what happens with the ldap group b in your list --- does it appear to have a "random" list of members in it when you log out and in? or is it stable, just wrong? what are you seeing when you say you have a hard time populating it

[11:50 AM] akrherz: modulok30: probably need to ask winsrev that one

[11:50 AM] modulok30: akrherz: but the client control plugin on the server is dictating the order, right?

[11:51 AM] modulok30 (anonymous) has left the room

[11:51 AM] ryushie: Daniel: Out of Group B i only see 1 person in my list

[11:51 AM] Guest382 (anonymous) has joined the room

[11:51 AM] Guest382 (anonymous) has left the room

[11:51 AM] modulok (anonymous) has joined the room

[11:52 AM] daniel.henninger: is that 1 person the same person every time or does it change?

[11:52 AM] ryushie: let me kill it and re open it

[11:52 AM] ryushie: Same person

[11:52 AM] Todd Getz (toddg@mtschat.ad.mtstravel.com/spark) has joined the room

[11:52 AM] ryushie: if i right click on his name, I can delete him

[11:54 AM] ryushie: i just checked another users machine and he has the same name in his list

[11:54 AM] Todd Getz: Daniel: Clearspace seems to have a bug when I try to edit the non-jive openfire plugins doc: <http://www.igniterealtime.org/community/docs/DOC-1041>

[11:54 AM] Todd Getz: it replaces the text links with the actual link path

[11:54 AM] dogmeat (dogmeat@jabber.org/EE) has joined the room

[11:56 AM] dogmeat: greets

[11:56 AM] daniel.henninger: hrm. if you turn in the debug logs in openfire, and possibly also set ldap.debugEnabled to true in system properties --- you should see exactly what openfire is getting from ldap to make sure it's getting the right things

[11:56 AM] Todd Getz: at least it does on windows using firefox 3

[11:59 AM] daniel.henninger: todd: I'm not following what's wrong =)

[11:59 AM] ryushie: Daniel; How can i change it so it does not put ... after a X chars

[12:00 PM] pstdenis (pstdenis@gmail.com/Home068791DD) has joined the room

[12:00 PM] daniel.henninger: change what?

[12:00 PM] ryushie: in the opefire debug

[12:00 PM] MxSan (im@mrxsan.net/Home) has joined the room

[12:00 PM] ryushie: When i look at the logs it does not always display the full line

[12:00 PM] Todd Getz: Daniel for instance when I edit the doc the plain text link for LDAP VCard Avatar Plugin becomes

<http://www.igniterealtime.org/community/docs/DOC-1350>

[12:01 PM] ryushie: ex: 2008.09.24 12:57:10 LdapManager: Created hashtable with context values, attempting to create context...

[12:01 PM] daniel.henninger: i usually look at the logs in the file system --- never been a fan of the log viewer

[12:01 PM] ryushie: LoL

[12:01 PM] wroot (wroot) has joined the room

[12:01 PM] daniel.henninger: that's a valid log entry i believe. it there's nothing hidden by the ...

[12:01 PM] daniel.henninger: s/it/ie/

[12:02 PM] wroot: hi

[12:02 PM] daniel.henninger: in other words:

[12:02 PM] daniel.henninger: `./org/jivesoftware/openfire/ldap/LdapManager.java: Log.debug("LdapManager: Created hashtable with context values, attempting to create context...");`

[12:02 PM] wroot: what these codes with backslashes mean?

[12:02 PM] daniel.henninger: =)

[12:02 PM] undefined (anonymous) has joined the room

[12:02 PM] undefined (anonymous) has left the room

[12:02 PM] spotter (anonymous) has joined the room

[12:02 PM] Guest268 (anonymous) has joined the room

[12:03 PM] wroot: s/it/ie/?

[12:03 PM] daniel.henninger: it's unix geez humor ;)

[12:03 PM] daniel.henninger: substitute it for ie

[12:03 PM] daniel.henninger: (text substitution)

[12:03 PM] wroot: i see

[12:03 PM] ryushie: 2008.09.24 12:57:10 LdapManager: In LdapManager.checkAuthentication(userDN, password), userDN is: CN="Ryan Thompson",OU="Employees",DC="clt"...

2008.09.24 12:57:10 LdapManager: Created context values, attempting to create context...

2008.09.24 12:57:10 LdapManager: ... context created successfully, returning.

2008.09.24 12:57:10 AuthorizationManager: Trying Default Mapping.map(rthompson)

2008.09.24 12:57:10 DefaultAuthorizationMapping: No realm found

2008.09.24 12:57:10 AuthorizationManager: Trying Default Policy.authorize(rthompson)

, rthompson)

2008.09.24 12:57:10 DefaultAuthorizationPolicy: Checking authenID realm

[12:03 PM] wroot: i was thinking this must be a subst for a typo

[12:04 PM] wroot: but i havent get the method :)

[12:04 PM] ryushie: wroot; its a VI command to correct a typo

[12:04 PM] ryushie: or replace a word

[12:04 PM] ryushie: heh

[12:04 PM] wroot: moremclear :)

[12:04 PM] daniel.henninger: you might need to restart openfire or clear the groups cache to see the actual useful output right now the groups are cached

[12:04 PM] wroot: s/m/ /

[12:04 PM] wroot: :)

[12:05 PM] daniel.henninger: also look in the actual group viewer to see if the group does actually look like it has everyone in it

[12:05 PM] ryushie: I'll clear the group cache

[12:05 PM] spotter (anonymous) has left the room

[12:05 PM] wroot: i never liked to use vi, that explains

[12:05 PM] ryushie: I do see everyone in group viewer

[12:05 PM] akrherz: ryushie: these others folks you aren't seeing in group B are online, right?

[12:06 PM] wroot: soo.. do you like or hate the new G1? :)

[12:06 PM] Guest230 (anonymous) has joined the room

[12:06 PM] Nulani (nulani@neko.im/Mundilfari) has left the room

[12:06 PM] Guest230 (anonymous) has left the room

[12:06 PM] Guest333 (anonymous) has joined the room

[12:06 PM] nulani (nulani@neko.im/Mundilfari) has joined the room

[12:07 PM] ryushie: Akrherz: I dont know, I dont even see them in my list of users

[12:07 PM] akrherz: ryushie: what client are you using again?

[12:07 PM] daniel.henninger: G1?

[12:08 PM] wroot: Google phone :)

[12:08 PM] Todd Getz: Daniel do you understand what I am saying now

[12:08 PM] ryushie: Akrherz; its a custom compile of 2.5.8

[12:08 PM] wroot: daniel.henninger, android based, you know ;)

[12:08 PM] daniel.henninger: hehe i'm a fan of phones that are used for --- wait for it ---
---- calling people and receiving calls. not really into these iphones and other assorted
"lets make your phone be an entire computing suite" ;)

[12:08 PM] Todd Getz: G1 is even less feature rich than 3G

[12:08 PM] Todd Getz: maybe even 2G

[12:09 PM] wroot: maybe, but it's open for everyone to customize and make it feature rich

[12:09 PM] ryushie: Akrherz; I installed a copy of beta 2.6.0 beta 2 and i dont see them in my list at all

[12:09 PM] wroot: i mainly speak about the platform

[12:10 PM] wroot: G1 is just a first one

[12:10 PM] daniel.henninger: oh lord it's one of those keyboard flip out phone things too

[12:10 PM] daniel.henninger: eww

[12:10 PM] Todd Getz: I will reserve further comments until the blackhats have some time with it

[12:11 PM] akrherz: anybody know what G1's smack implementation looks like?

[12:11 PM] Todd Getz: Daniel do you understand my clearspace edit issue yet?

[12:11 PM] Guest333: Hello. I just finished setting up a new OF server (3.6.0) on FreeBSD with LDAP integration. Everything is working very well but I can't seem to get the monitoring plugin to work. I have it loaded and per the instructions have made sure the enterprise plugin so not running and successfully added the needed SQL statements to my MySQL DB. The docs then say to go to "Server --> Archiving --> Archiving Settings". Problem is that there is no "Archiving" link/tab anywhere. Any thoughts on how to troubleshoot this?

[12:12 PM] daniel.henninger: todd: i don't understand what's wrong with that

[12:12 PM] akrherz: Guest333: does the plugin page show the plugin as loaded?

[12:12 PM] Guest333: yes

[12:12 PM] Todd Getz: It is converting plain text that happens to be a hyperlink to the actual hyperlink

[12:12 PM] Guest210 (anonymous) has joined the room

[12:12 PM] nulani (nulani@neko.im/Mundilfari) has left the room

[12:13 PM] Guest210 (anonymous) has left the room

[12:13 PM] daniel-brazil (anonymous) has joined the room

[12:13 PM] wroot: akrherz, i suppose one have to take a look at android's SDK to find out

[12:13 PM] Guest259 (anonymous) has joined the room

[12:13 PM] Todd Getz: Click edit on the doc after looking at it so you can see what I mean

[12:13 PM] daniel.henninger: ah hrm well report it in the jive lounge if you don't mind so i have it recorded somewhere

[12:13 PM] akrherz: Guest333: try reloading the plugin, does anything appear in the logs?

[12:13 PM] nulani (nulani@neko.im/Mundilfari) has joined the room

[12:13 PM] Guest259 (anonymous) has left the room

[12:13 PM] spotter (anonymous) has joined the room

[12:13 PM] Todd Getz: ok

[12:14 PM] Todd Getz: will do

[12:14 PM] daniel.henninger: thanks!

[12:14 PM] wroot: mm, firefox has crashed on Reply for me again today (after i have cleared the browser cache)

[12:15 PM] ryushie: One thing i did notice, My account is rthompson@IMserver/spark While everyone else is user@imserver

[12:15 PM] ryushie: account*

[12:15 PM] wroot: ryushie, this is normal, spark is you resource

[12:16 PM] wroot: where do you see your account like that?

[12:16 PM] ryushie: in the user list

[12:16 PM] daniel-brazil: Hi , can anyone help me with the Sip Client plugin for Spark ? I click on the "+" sign the software tells me that is downloading, but after the progress bar is done, nothing happens...I already restart my Spark Client and nothing...I also already configured the SIP Phone Mappings plugin on OpenFire server ./ Any ideas?

[12:16 PM] wroot: in Admin Console?

[12:16 PM] Guest333: reloading doesn't bring anything new up.. will try again tailing error.log

[12:17 PM] ryushie: yes sorry

[12:17 PM] Guest333: 2008.09.24 10:15:45

[org.jivesoftware.openfire.archive.ArchiveIndexer.start(ArchiveIndexer.java:119)]
java.io.IOException: XML properties file must be writable: indexprops.xml

[12:17 PM] Guest333: where would indexprop.xml live?

[12:17 PM] daniel.henninger: *blink* I don't even know what the hell that is ;D wow

[12:17 PM] Guest333: 2008.09.24 10:15:45

[org.jivesoftware.openfire.container.PluginManager.loadPlugin(PluginManager.java:507)] Error loading plugin: /usr/local/share/java/openfire/plugins/monitoring
org.picocontainer.PicoLifecycleException: PicoLifecycleException: method 'public abstract void org.picocontainer.Startable.start()', instance
'org.jivesoftware.openfire.archive.ArchiveIndexer@103bc02, null

[12:17 PM] wroot: ryushie - where exactly? on what list?

[12:17 PM] wroot: list*

[12:18 PM] wroot: i dont see full JIDs in my Admin Console

[12:18 PM] daniel.henninger: it almost sounds like the plugin didn't extract properly or something

[12:18 PM] daniel.henninger: try destroying the plugin install entirely, redownload it, and reinstall it

[12:18 PM] akrherz: Guest333: does the user running openfire able to write to your install directory ?

[12:18 PM] Todd Getz: Posted the issue in Jive lounge

[12:19 PM] Guest322 (anonymous) has joined the room

[12:19 PM] Todd Getz: I8r all got another meeting to go to

[12:20 PM] wroot: bye

[12:20 PM] daniel-brazil: daniel.henninger, tks, but it would help if I could download the JAR file direct from a site....but I don't know where :/

[12:20 PM] Guest333: checking

[12:20 PM] Todd Getz (toddg@mtschat.ad.mtstravel.com/spark) has left the room

[12:20 PM] daniel.henninger: www.igniterealtime.org [http://www.igniterealtime.org] go to downloads openfire plugins

[12:20 PM] wroot: daniel-brasil

http://www.igniterealtime.org/projects/openfire/plugins.jsp

[12:21 PM] nulani (nulani@neko.im/Mundilfari) has left the room

[12:21 PM] Guest333: thnx. that was it. owned by root.

[12:21 PM] ryushie: wroot: https://IMServer:9091/user-roster.jsp?username=Ryushie

[12:22 PM] nulani (nulani@neko.im/Mundilfari) has joined the room

[12:22 PM] Guest268 (anonymous) has left the room

[12:22 PM] jadestorm (anonymous) has joined the room

[12:22 PM] jadestorm: ya know it might actually be easier to talk from here since I can actually see people's nicknames

[12:22 PM] ryushie: no one else has a resource associated with there name but me

[12:22 PM] Guest333: so... while digging around trying to fix this I saw a lot of requests for the ability to purge the DB of conversations every X days or whatnot. Is there any provision for clearing out old logs?

[12:22 PM] jadestorm: ichat is not good at that

[12:22 PM] ryushie: and they are all using the exact same client i am

[12:22 PM] daniel-brazil: Oh God! shame on me ! I thought this site was just for the Openfire-Server plugins :)

[12:23 PM] daniel-brazil: TYVM ! :)

[12:23 PM] jadestorm: but the monitoring plugin -is- an openfire server plugin =)

[12:23 PM] akrherz: ryushie: that entry must be from a manual addition

[12:23 PM] Guest319 (anonymous) has joined the room

[12:23 PM] Guest340 (anonymous) has joined the room

[12:23 PM] jadestorm: (btw for anyone who doesn't know me by my nickname, Jadestorm == daniel.henninger)

[12:24 PM] ryushie: akrherz, It should of been auto populated via the Ldap Group

[12:24 PM] Guest319 (anonymous) has left the room

[12:24 PM] wroot: ryushie, you see yourself in your roster list?

[12:24 PM] ryushie: no

[12:24 PM] akrherz: ryushie: if it is no big deal, try restarting openfire

[12:25 PM] ryushie: akrherz: I think it will be okay, One min

[12:25 PM] ryushie: can i do this from the console?

[12:25 PM] akrherz: negative

[12:25 PM] ryushie: have to log into the server?

[12:26 PM] akrherz: positive

[12:26 PM] ryushie: rgr

[12:26 PM] Guest303 (anonymous) has joined the room

[12:27 PM] Guest303 (anonymous) has left the room

[12:27 PM] starry (anonymous) has joined the room

[12:28 PM] hsteindl (hsteindl@proxy.mocom.at/MacMini) has joined the room

[12:29 PM] wroot: one more thing about Documents, i dont understand version comparing

[12:29 PM] starry (anonymous) has left the room

[12:29 PM] Guest340 (anonymous) has left the room

[12:29 PM] wroot: i compare revision 14 to revision 15 (last is mine)

[12:29 PM] wroot: but it shows some edits that i havent done

[12:32 PM] pstdenis: Are nightlies ever fresher than SVN? It seems that nightlies are created every night (duh) even if the SVN hasn't changed

[12:32 PM] akrherz: pstdenis: nightlys are built from svn

[12:33 PM] wroot: svn can be fresher until next nightly is built :)

[12:34 PM] hsteindl: Hi, I see the Spark Build Server being down for months now. Any chance to get this up and running again in order to built a custom client?

[12:34 PM] wroot: i think nightlies are building automatically

[12:34 PM] daniel-brazil: Guys, tks alot...byebye

[12:34 PM] daniel.henninger: I believe that service has been discontinued

[12:34 PM] daniel-brazil (anonymous) has left the room

[12:35 PM] daniel.henninger: there's a doc on ignite realtime done by Rob Alexander that shows you how to build a custom client yourself and for free though

[12:36 PM] hsteindl: @daniel: Well, The site is still up but does not work anymore. Thank for the info but I dont think I'll install a complete JAVA development center just for this.. Anybody out there you offers this?

[12:36 PM] hsteindl: who offers this??

[12:36 PM] daniel.henninger: don't know

[12:36 PM] spotter (anonymous) has left the room

[12:36 PM] p5yph3r (anonymous) has left the room

[12:39 PM] modulok: will there ever be a blackberry version of spark?

[12:39 PM] wroot: it's already hard to keep PC version of Spark updating :)

[12:40 PM] akrherz: that question is impossible to answer, who knows

[12:40 PM] hsteindl: BTW how is 2.6 of Spark proceeding? Any release date in sight?

[12:40 PM] modulok: i searched through forums and there was very brief mention, i think back in 2006

[12:40 PM] modulok: beta2 just came out

[12:40 PM] wroot: but that won't be Spark anymore, like SparkWeb is not a Spark in my opinion

[12:41 PM] modulok: true

[12:41 PM] wroot: hsteindl, beta 2 is out, so far no final release date

[12:41 PM] hsteindl: cant find the changelog for Beta2

[12:42 PM] modulok: <http://www.igniterealtime.org/community/message/179609>

[12:42 PM] hsteindl: thx alot

[12:42 PM] modulok: np

[12:43 PM] akrherz: hehe, I am doing all sorts of security audit / threat stuff for openfire. Kind of interesting to see what happens when you start forging the from="" part of different types of packets.

[12:44 PM] wroot: something terrible? :)

[12:44 PM] *nate (nate@jivesoftware.com/tealaptop) has joined the room*

[12:45 PM] akrherz: nothing yet, I am trying to track down 2 DOS situations that can occur as well

[12:45 PM] ryushie: so im not allowed to restart the service. I dont have the admin password lol

[12:45 PM] wroot: ryushie, this is a problem, especially with Openfire

[12:45 PM] akrherz: one of them is some sort of freaky thing that happens when you start pretending your conference server is a buddy :)

[12:46 PM] wroot: hm.. you start to talk to all room members at once? :)

[12:46 PM] *Guest116 (anonymous) has joined the room*

[12:46 PM] wroot: or is it has a soul? :)))

[12:47 PM] wroot: conference service i mean :)

[12:48 PM] ryushie: my co-worker does not understand the issue and wont really let me fix it :-/

[12:48 PM] *Guest9 (anonymous) has joined the room*

[12:48 PM] *Guest9 (anonymous) has left the room*

[12:48 PM] akrherz: rysuhie: can you try any other clients ?

[12:49 PM] wroot: it seems i dont even know what the issue is :) i just jump in in the middle of your talk :)

[12:50 PM] ryushie: Akrherz; What client would you like?

[12:50 PM] wroot: Exodus, Psi

[12:50 PM] akrherz: ryushie: pidgin, hehe :)

[12:50 PM] ryushie: rgr Pidgin it is

[12:51 PM] ryushie: i like pidgin my self

[12:51 PM] akrherz: also, when you talk about IMserver as your domain name, is that what it is or ?

[12:51 PM] *Guest322 (anonymous) has left the room*

[12:51 PM] *Guest301 (anonymous) has joined the room*

[12:51 PM] ryushie: its actually IM.Domainname
[12:51 PM] akrherz: and, you sure you have "Enable Group sharing" enabled for the groups in question?
[12:52 PM] ryushie: i just stripped it
[12:52 PM] ryushie: Akrherz, Group sharing is enabled
[12:52 PM] modulok: does anyone here use pidgin with an openfire server using ldap?

[12:52 PM] hsteindl: Do you guys think the Jabber/Cisco Deal is the tipping point in order to get the ball rolling reg. company to company federation?
[12:52 PM] hsteindl: federation
[12:53 PM] Guest301 (anonymous) has left the room
[12:54 PM] wroot: Jabber Inc.
[12:54 PM] wroot: or jabber.com, not jabber.org
[12:54 PM] ryushie: i installed pidgin
[12:54 PM] ryushie: and the same thing i do not see the group
[12:54 PM] ryushie: or my self
[12:54 PM] akrherz: ryushie: you have show offline users and show empty groups enabled in pidgin?
[12:54 PM] hsteindl: wroot, I do know the difference
[12:55 PM] wroot: ok
[12:55 PM] akrherz: ryushie: is it possible to post screen shots of your group A and group B pages on the admin console ?
[12:56 PM] hsteindl: maybe I should have called it "Cisco goes XMPP" deal..
[12:56 PM] ryushie: can i email it to you?
[12:56 PM] akrherz: ryushie: you will also want to restart pidgin once, since it doesn't pick up on shared rosters the first login... sure; akrherz@iastate.edu
[12:56 PM] wroot: but my english doesnt let me to fully understand your sentence :)
[12:56 PM] Guest459 (anonymous) has joined the room
[12:57 PM] wroot: hsteindl, maybe they will implement something in XMPP, but i doubt this will become public stuff
[12:57 PM] pstdenis: modulok: does anyone here use pidgin with an openfire server using ldap? Yes
[12:57 PM] pstdenis: Active Directory specifically
[12:59 PM] modulok: as far as i know, pidgin keeps user info in cleartext
[12:59 PM] Guest459 (anonymous) has left the room
[12:59 PM] jxerson (anonymous) has joined the room
[1:00 PM] daniel.henninger: sorry folk got pulled away a bit and now i need to get going doesn't look like i was really needed though lol
[1:00 PM] modulok: specifically accounts.xml
[1:00 PM] daniel.henninger: y'all take care!

[1:00 PM] ryushie: Dan; your always needed
[1:00 PM] ryushie: :p
[1:00 PM] daniel.henninger: lol
[1:00 PM] wroot: oh
[1:00 PM] akrherz: modulok: <http://developer.pidgin.im/wiki/PlainTextPasswords>
[1:00 PM] modulok: this is the reason why I am changing from Pidgin to Spark
[1:00 PM] wroot: it's time, right
[1:00 PM] ryushie: Akrherz; taking snappys now
[1:00 PM] wroot: bye :)
[1:01 PM] daniel.henninger (daniel.henninger@jivesoftware.com/Ecco) has left the room
[1:01 PM] jadestorm (anonymous) has left the room
[1:01 PM] nate (nate@jivesoftware.com/tealaptop) has left the room
[1:01 PM] wroot (wroot) has left the room
[1:02 PM] modulok: akrherz: is there a topic you won't find a link for? lol
[1:02 PM] pstdenis: Did you read the "But other programs don't store my password in plain text!" part?
[1:03 PM] akrherz: modulok: what do you think about openfire storing all passwords in plain text?
[1:05 PM] jxerson (anonymous) has left the room
[1:05 PM] ryushie: Akrherz; snappys sent
[1:05 PM] modulok: I have control over the openfire server. there isn't anything to stop someone from finding a local accounts file on a shared or non-shared PC
[1:05 PM] akrherz: if you have a malicious user that close to your data currently, you have other problems than what pidgin is doing
[1:06 PM] modulok: I know
[1:07 PM] akrherz: ryushie: nothing yet
[1:08 PM] ryushie: no rush
[1:08 PM] ryushie: I have till 7pm EST
[1:08 PM] ryushie: ^.^
[1:08 PM] nulani (nulani@neko.im/Mundilfari) has left the room
[1:10 PM] akrherz: can you send it to my gmail too, I don't want to wait that long
akrherz@gmail.com
[1:12 PM] ryushie: LoL
[1:12 PM] ryushie: ok one sec
[1:12 PM] modulok: akrherz: if you were using openfire/pidgin with ldap, what would you do?
[1:12 PM] MxSan (im@mxsan.net/Home) has left the room
[1:12 PM] akrherz: I dunno, it is an issue
